Your teams answer six questions daily. Your managers get clarity before it's too late.

THE SIX DIMENSIONS

Every day, each team member receives a short anonymous check-in built on six dimensions that predict whether someone stays or leaves.

C — Communication
Is information flowing both ways? Do people feel heard?

L — Learning
Are people growing? Do they feel like they're developing?

O — Opportunity
Can people see a future here? Is there somewhere to go?

V — Vulnerability
Can people be honest without risk? Is it safe to speak up?

E — Enablement
Do people have what they need to do their job? Are blockers being removed?

R — Reflection
Do people feel recognized? Is their contribution visible?

These aren't opinion questions. Each maps to specific neurochemical drivers of retention documented in peer-reviewed research. When a dimension shifts, it shows up before the person has made a decision. Not after.

THE RHYTHM

Daily: Anonymous team check-ins. Takes under two minutes.

Bi-weekly: Manager reports showing what's changed, who's at risk, and what to do about it.

Monthly: Team-level insights showing patterns across the organization.

Quarterly: Executive reporting showing cost impact and trend data.

THE ACTION HUB

Managers don't get a dashboard and a "good luck." They get specific recommended actions tied to what's actually shifting on their team. The system tells them who needs attention, why, and what conversation to have. Not theory. Not training. A specific next step for a specific person this week.

What Changes When It's Running

BEFORE CLOVER ERA VS AFTER CLOVER ERA

BEFORE	AFTER
Manager finds out someone is leaving when they resign	Manager sees risk signals weeks before a decision is made
Exit interviews explain what already happened	Daily data shows what's happening right now
Annual survey captures one moment in time	Continuous measurement captures shifts as they occur
Managers rely on gut instinct to assess team health	Managers receive specific, timely data on each team member
Turnover cost is a number finance reports once a year	Turnover cost is a live figure leadership can act on
The question is "why did they leave?"	The question becomes "who can we keep?"

WHAT YOUR MANAGERS SEE

A bi-weekly report that answers three questions:

1. Who on my team should I be paying attention to right now?
2. What specifically changed and when?
3. What should I do about it this week?

No noise. No aggregate scores. No 40-page report that sits unread. Three answers that lead to one conversation.

INVESTMENT

Pricing is based on the number of teams and people covered. Every tier breaks even at a single prevented departure.

The average cost of one departure: **$91,582**.

The investment breaks even at one.
