The cost between what you're tracking and what you're losing.

THE GAP

~~$696,420~~ → **$2,785,680**

WHAT YOU'RE TRACKING | WHAT IT'S ACTUALLY COSTING

Most companies track turnover rate. The ones who lose least track turnover cost. The gap is typically 4X.

HOW CLOVER ERA WORKS

1. We measure what's actually happening across your teams through daily anonymous check-ins built on six proven retention dimensions.
2. Your managers receive specific, prioritized actions before someone reaches the point of resignation.
3. You see cost impact at the team, department, and company level, updated in real time.

> **Every month without visibility costs *Meridian Logistics* approximately $228,960. Not in scores. In replacement costs, lost productivity, and institutional knowledge walking out the door.**

We will show you the exact gap between what you're tracking and what you're losing. No commitment. No pitch. Just the math.

"We already track turnover."

You track who left and when. Clover ERA measures why they're about to. Most organizations calculate turnover using direct replacement cost only. The full cost, including lost productivity, knowledge transfer failure, team disruption, and manager time, runs 4X higher. For *Meridian Logistics* at 340 employees, the difference between what you're reporting to the board and what turnover is actually costing is approximately **$2,089,260**.

"How is this different from what we already have?"

Annual surveys measure what people felt three months ago. Quarterly pulse checks measure what people felt three weeks ago. Clover ERA measures what's changing today across six dimensions: Communication, Learning, Opportunity, Vulnerability, Enablement, and Reflection. Each maps to specific neurochemical drivers of retention. When a score shifts, the manager gets a recommended action before the shift becomes a resignation. The difference is timing. Most tools tell you what happened. This tells you what's happening.

"What's the ROI?"

Single prevented departure at *Meridian Logistics* saves approximately $91,582.

TIER	TEAMS	PEOPLE COVERED	MONTHLY	ANNUAL	BREAKS EVEN AT
10 Teams	10	Up to 200	$2,100	$25,200	**1 departure**
25 Teams	25	Up to 500	$4,500	$54,000	**1 departure**
50+ Teams	50+	500+	Custom	Custom	**1 departure**

Every tier is profitable if it prevents one departure. At *Meridian Logistics*, one departure costs **$91,582**. The highest investment tier listed above is **Custom**.

> *Meridian Logistics* currently has approximately 340 employees. Based on industry averages, **30** will leave this year. At **$91,582** per departure, that represents **$2,785,680** in total turnover cost. The question is not whether people will leave. It's how many you can prevent and how early you see it coming.
