

What You're Offering Your Clients

Your clients are losing people they can't afford to replace. Clover ERA gives you a retention offering that sells on math, not promises.

The Problem You Solve For Your Clients

Your clients track turnover rate. They don't track turnover cost. The gap is typically 4X what they estimate. Clover ERA makes that gap visible and gives their managers tools to close it before people resign.

C Communication Is information flowing both ways? Do people feel heard?	L Learning Are people growing? Do they feel like they're developing?
O Opportunity Can people see a future here? Is there somewhere to go?	V Vulnerability Can people be honest without risk? Is it safe to speak up?
E Enablement Do people have what they need to do their job? Are blockers being removed?	R Reflection Do people feel recognized? Is their contribution visible?

Each dimension maps to specific neurochemical drivers of retention documented in peer-reviewed research. This is the methodology behind the platform your clients will use.

The Rhythm

Daily: Client team members answer a short anonymous check-in. Takes under two minutes.

Bi-weekly: Client managers receive reports showing what's changed, who's at risk, and what to do.

Monthly: Team and department level insights showing patterns across the client organization.

Quarterly: Executive reporting showing cost impact and retention ROI.

How To Position It

This is operational infrastructure, not HR software. Sell to CEOs, CFOs, and COOs. The buyer is the person who owns the P&L, not the person who owns the people survey. The Turnover Intelligence Report is your door opener. A personalized financial exposure analysis for any company, generated in minutes. It shows them the gap between what they think turnover costs and what it actually costs. That report starts the conversation. Clover ERA is what they buy to close the gap.

The Commercial Opportunity
